

Closest milestone : Tracker DAQ Integration : M17

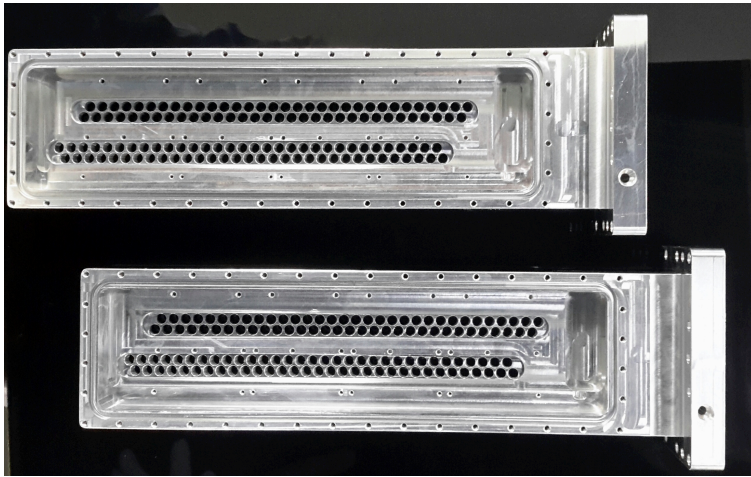

- Crate established at FNAL in MC-1 : emulated data (in firmware) through to offline from calo + tracker
- On track to be completed at end of this year M12.

WP1 : g-2 Detectors

TASK 1.3 : BUILD STRAW TRACKER

Manifold production begun (6 from 30 complete) at Liverpool
- awaiting new straws from FNAL.

Leak-testing QA being established

Final HV modules (from FNAL) being tested with prototype

First module to have final electronics integrated in May and
will be shipped to FNAL in June.

Expect first tracker station (8 modules) to be installed in
November.
